PROFESSIONAL SUMMARY

Full Stack Software Developer experienced in building enterprise banking platforms, contractual workforce payroll systems, payment gateways, and business analytics dashboards. Strong expertise in Java, Spring Boot, Spring Security, REST APIs, Microservices, React.js, Next.js 16, TypeScript, PostgreSQL, Supabase, MySQL, AWS, and Docker. Experienced in developing secure REST APIs, role-based access control, payroll business logic, database optimization, Excel data processing, payment integrations, and cloud deployments.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, SQL
- **Frameworks & Libraries:** React, Node.js, Express, Spring Boot
- **Databases:** PostgreSQL, MongoDB, MySQL, Redis, Supabase DB, Oracle DB
- **Cloud & DevOps:** AWS (EC2, S3), Docker, Kubernetes, CI/CD, GitHub Actions, Jenkins
- **Tools & Technologies:** Git, REST APIs, GraphQL, Microservices, Agile/Scrum, JIRA, Postman, GitHub

PROFESSIONAL EXPERIENCE

Software Engineer

May 2026 – Present

Varnilix Pvt Ltd

Pune, Maharashtra

- Developed and contributed to a production-ready Unified Wage Management System (UWMS) for managing contractual workforce, attendance, leave, overtime, payroll processing, salary slips, deductions, reimbursements, and Full & Final settlements across multiple client projects.
- Designed and implemented scalable payroll business logic and processing workflows, including salary calculation, overtime, leave, PF, ESIC, PTAX, LWP, incentives, deductions, reimbursements, advance payments, uniform deductions, and payroll finalization.
- Designed and optimized PostgreSQL/Supabase database schemas, queries, and payroll data workflows to support reliable and high-volume payroll processing.
- Developed automated Excel-based master data and attendance import workflows, reducing manual data processing and improving payroll accuracy.
- Technologies: Next Js, Typescript, PostgreSQL, Supabase DB, AWS, Docker, Git.

Junior Software Engineer

Oct 2024 – March 2026

The Data Tech Lab

Pune, Maharashtra

- Developed and maintained **production-ready IMMSG (Integrated Management System) and FFMC (Foreign Exchange Management System) projects** using Java, Spring Boot, REST APIs, and Oracle Database.
- Designed and optimized **RESTful APIs and backend services**, improving API response time by approximately **30%** through query optimization, efficient data processing, and performance improvements.
- Implemented secure and reliable **database transactions, business logic, validation, exception handling, and API integrations** for enterprise-level applications.
- Collaborated with clients, stakeholders, and cross-functional teams to understand requirements, design workflows and ER diagrams, and deliver scalable production-ready solutions.
- Contributed to production deployments, troubleshooting, performance optimization, and maintenance, ensuring application stability and timely resolution of critical issues.
- Technologies: Java, Spring Boot, FlutterFlow, Git, Hybrid Encryption Decryption, Spring Security, Oracle Database.

KEY PROJECTS

UWMS (Unified Workforce Management System) | Next.js — React — TypeScript — PostgreSQL — Supabase — AWS

- Developed a production-ready workforce management and payroll system supporting employee master data, attendance, leave management, overtime, incentives, deductions, advances, uniform management, and salary processing.
- Implemented a configurable payroll calculation engine covering gross salary, PF, ESIC, PTAX, LWP, LWW, overtime, paid holidays, incentives, reimbursements, deductions, and net salary calculations.
- Built and integrated REST APIs, database workflows, Excel-based imports, payroll finalization, salary slips, and project-specific configurations, while resolving production issues and optimizing system performance.
- Collaborated with business analysts, frontend developers, and other stakeholders to understand requirements, troubleshoot issues, and deliver enhancements for smooth project execution.

Automation of Property Sourcing | *Java, Spring Boot, Hibernate, Oracle Database, Spring Security, Hybrid Encryption Decryption*

- Developed a property sourcing automation application that streamlined branch location selection and approval workflows, reducing manual effort by approximately 70%.
- Designed and developed Spring Boot REST APIs to manage property details, approval workflows, and interactions between internal teams and external stakeholders.
- Integrated Aadhaar OTP Verification API to securely verify users during the application login process and improve authentication.
- Developed a mail-sending API to provide real-time notifications to stakeholders regarding property approval status and subsequent actions.
- Enabled IFM teams to schedule and conduct negotiations with landlords and brokers through the application, reducing in-person visits by approximately 60%.

FFMC Registration and LRS Reporting | *Java, Spring Boot, REST APIs, Oracle Database*

- Developed a web-based application to automate FFMC registration and LRS reporting, replacing manual processes and reducing paperwork by approximately 60%.
- Designed and developed REST APIs using Spring Boot and Oracle Database for FFMC registration, transaction validation, and regulatory submission workflows.
- Implemented a CSV-based transaction upload module that enabled FFMCs to submit daily transaction reports digitally with efficient data processing.
- Collaborated with stakeholders to understand business requirements and convert manual reporting workflows into efficient digital processes.

EDUCATION

Jagadamba College Of Engineering and Technology

Computer Engineering, CGPA: 7.64/10.00

July 2020 – June 2024

Yavatmal, Maharashtra

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure 2023 Certified Foundation Associate.
- HackerRank Certification Of Skill Java(Core Java).
- Published research paper on "Optimizing Neural Networks for Edge Devices" at I
- Runner up in "**Code Champ 2022**" of JCOET.
